Figure 9C-8. Examples of Obstruction Pavement Markings

A - Obstruction within the path

B - Obstruction at edge of path or roadway

\[ L = WS, \quad \text{where } W \text{ is the offset in feet and } S \text{ is bicycle approach speed in mph} \]

\[ \star \text{ Provide an additional foot of offset for a raised obstruction and use the formula } \]

\[ L = (W+1)S \text{ for the taper length} \]

Figure 9C-9. Shared Lane Marking

- Direction of bicycle travel
- Obstruction, abutment, grate, or other obstruction
